

# Government Compliance Solution

## Benefits

- DNA Fusion and HID pivCLASS® Solution
- Increases security and privacy at your facility
- Reduces costs and increases efficiency
- Promotes trust and interoperability
- Improves overall support for FICAM implementation
- Support for multiple credentials & biometrics
- Centralized management of credentials
- Achieve government mandated compliance with proven products

## Open Options FIPS 201-2 approved products include:

- DNA Fusion version 7.7
- SSP-D2-FIPS
- NSC-100-FIPS
- RSC-2-FIPS

\*Additional software may be required to achieve full compliance

## FIPS 201-2

### Overview

Open Options offers an end-to-end integrated FIPS 201-2 compliance solution with the HID pivCLASS® product family. DNA Fusion access control software interfaces with the pivCLASS® Authentication Module (PAM), registration engine and certificate manager to simplify overall compliance with the FIPS 201-2 standard at any assurance level.

Open Options DNA Fusion and partner products have been approved as FIPS 201-2 compliant, as it relates to PACS (Physical Access Control Systems) by the National Institute of Standards and Technology. Open Options core products, including DNA Fusion, SSP-D2-FIPS, NSC-100-FIPS and RSC-2-FIPS, are on the GSA Approved Products List (APL) for use by any government entity.

Open Options has teamed up with industry leaders to provide complete, state-of-the-art system upgrades and replacement hardware that allow existing security systems to implement FICAM (Federal Identification, Credential, Access Management) solutions that achieve government compliance.

# Government Solution FAQ

## What does PACS stand for?

Physical Access Control Systems

## What is HSPD-12?

HSPD-12 is a Homeland Security Presidential Directive (no. 12) that states the requirement for a common credential that would function across all government agencies.

## What is the NIST?

The National Institute of Standards and Technology maintains a body of standards known as the Federal Information Processing Standards (FIPS).

## Which standards apply to our systems?

FIPS 201-2

## What is FIPS 201-2?

FIPS 201-2 (Federal Information Processing Standard Publication 201-2) is a US federal government standard that specifies Personal Identity Verification (PIV) requirements for federal employees and contractors.

## How does FIPS 201-2 relate to access control systems?

In 2013, FIPS 201-2 was released with PACS fully incorporated. Along with this came the Approved Products List (FIPS 201-2 APL). In relation to HSPD-12 requirements, our products that are on the current APL for FIPS 201-2 would meet that compliance.
