Pearland Police Department

CUSTOMER

The City of Pearland is the 3rd largest city in the Greater Houston area. Pearland is also the fastest growing city in Brazoria County, the fastest growing suburb in the Greater Houston area, and the 10th fastest growing suburb in Texas. Pearland encompasses territory in Brazoria, Fort Bend, and Harris counties and has an estimated population of 92,611 as of July 2009. The Pearland Police Department was created in 1960 and currently has 135 sworn police personnel. Because of the city’s rapid growth and its proximity to Houston, Texas, Pearland is constantly faced with challenges to keep pace with the ever-growing city.

CHALLENGES

In 2006, a much needed project to revamp the Pearland Police Department was started. Because of the city’s rapid growth and its proximity to Houston, Pearland is constantly faced with challenges to keep pace with the ever-growing city and the police department’s aging facility was far behind. Soon new construction for a better police station began. Security in a government facility and police department is highly important. Pearland PD’s new renovation required a system that could efficiently integrate access control, video management and intercom communications through one interface that would be user friendly for the system’s administrators. The police department also needed a way to quickly and easily secure certain entry and exit.

SOLUTION

In early 2010, with the opening of the new facility approaching, Open Options and Securadyne Houston planned and completed installation for the building’s fully integrated security system. By using the DNA Fusion interface to operate access control along with Milestone’s XProtect Corporate IP Video Management and Stentofon’s AlphaCom Intercom Communications, the companies successfully provided Pearland PD with a security system to fit its requirements. Also, the system included 9 Open Options Sally Port Controllers for new building’s entry/exit management. When Pearland’s new police department opened, the system was ready for use and prepared to adapt to the growing community’s needs.
