

Clover School District

May 5, 2014

To whom it may Concern:

I would like to take this opportunity to highly recommend Open Options Inc. as an outstanding solution for an access control system in any environment.

I have had the pleasure of working with Charles Johnson and his staff for the past year and a half now and have been extremely pleased with the levels of knowledge and the support given by the team of personnel at Open Options. The DNA Fusion offered by Open Options is a world class access control software that encompasses many facets of access control that is not only easily expandable but because of the open source architecture, it allows for integration with other software packages for more feature integration.

We have installed The DNA fusion software and added Schlage AD400 locks on our doors at the high school and have no issues with the system at all. With the ease of creating schedules and access levels we are able to secure and monitor the campus in the fashion that we desire. We are also in the process of designing two new schools and will install the system at both schools covering every exterior door on the building as well as adding the system to every school and building within the district.

I look forward to working with them on a continuing basis and would highly recommend them to other organizations that need an access control system and company that they can rely on.

Sincerely,

A handwritten signature in black ink, appearing to read "Charlie Walker".
