Dear Ben,

I would like to thank you on behalf of the Harris County Toll Road Authority for all of the effort and professionalism that you have provided. Working with Open Options to build our access control system has been a pleasure. Not only did you provide quality software and hardware, but you provided outstanding service as well.

The DNA Fusion system that HCTRA purchased is flexible, yet secure and enabled us to create the best fit for our facilities. The software features allow us to mold our system to accommodate our specific needs and simplify our security management in general.

At HCTRA we are very satisfied with the Open Options and are happy to recommend your exceptional products and service.

Thank you,

Steve Miller
Incident Management Security Director
Harris County Toll Road Authority
