

Fusion Mobile

Remote management app

Overview

Fusion Mobile is a remote management app for Open Options DNA Fusion access control software. Fusion Mobile allows users to take advantage of critical features of their DNA Fusion system while on the go.

Users can easily monitor and edit personnel and control hardware directly from their mobile device. The application also has the capability to run trace history and email reports. Advanced features include real time reporting, acknowledging alarms with a simple swipe and a favorites menu for quick access to common functions. In addition mobile users can execute pre-defined direct commands in emergency situations as well as view and control real time feeds from fixed or PTZ cameras.

Fusion Mobile is available for iOS 6 and higher on the iPhone and ICS 4.0 and up for all android mobile devices or tablets. The application can be used with DNA Fusion V6 and greater.
